

Lab Notebook Entry 33

Date Performed

5/19/17

Procedure

miniprep pThermolyse backbone

Details

Purpose: Get the pThermolyse backbone out of the cells in DNA form. Materials: NOTE: Our P1000 pipet doesn't work right now, so don't try using it, Miniprep kit (blue box on counter by the fridge), pThermolyse backbone starter cultures, eppendorf tubes

Protocol

Use the protocol for minipreps in the 2017 protocol file.
